

Hinterland Updates Quebec Exploration Activity

09.09.2014 | [Marketwired](#)

VAL D'OR, QUEBEC--(Marketwired - Sep 9, 2014) - [Hinterland Metals Inc. \(TSX VENTURE:HMI\)](#) ("**Hinterland**" or the "**Company**") is pleased to provide an update of ongoing exploration on three projects in Quebec.

An 80-kilometre electromagnetic ground survey has been completed on the 94-claim (4,209-hectare) Guyberry property ("Guyberry") located approximately 95 kilometres northwest of Val d'Or, Quebec. Guyberry covers a 10-kilometre section of the Chicobi Deformation Zone ("CDZ") within volcanic rocks adjacent to the southern margin of a felsic intrusion. The goal of the survey is to better define the CDZ and determine any conductive zones along it that may contain gold-bearing sulphide mineralization. The field data is currently being processed and compiled into sections and maps.

In preparation for an electromagnetic ground survey, a 135-kilometre grid has been recently cut on the 67-claim (2,882-hectare) Mozart property ("Mozart") located approximately 60 kilometres northeast of Val-d'Or, Quebec. Mozart covers an under-explored, 10-kilometre segment of the Carpentier-Courville deformation corridor. In November 2012, Hinterland completed a combined airborne magnetic and electromagnetic survey over Mozart and identified 11 new target areas with potential for volcanic massive sulphide-type and/or shear-type gold structures. The goal of the upcoming electromagnetic ground survey is to better define these target areas.

Hinterland is currently carrying out an 80-kilometre electromagnetic ground survey on the 14-claim (784-hectare) Surprise project located approximately 45 kilometres south of Chapais, Quebec. This property shows favourable geology and fault structures, and has gold mineralization documented in a previous drill hole. The goal of the survey is to identify any conductive zones that may contain gold-bearing sulphide mineralization.

Mark Fekete (P.Ge.) is the designated "Qualified Person" as defined in Section 1.2 in, and for the purposes of, National Instrument 43-101 responsible for the technical content of this release.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. This release may contain forward-looking statements that are subject to known and unknown risks and uncertainties that could cause actual results to vary materially from targeted results. Such risks and uncertainties include those described in the Company's periodic reports including the annual report or in the filings made by the Company from time to time with securities regulators. The Company undertakes no obligation to publicly release the result of any revision of these forward-looking statements to reflect events or circumstances after the date they are made or to reflect the occurrence of an unanticipated event.
