The following investment highlights are included in the presentation.

- Commissioning of the lithium carbonate plant commenced in August with the plant expected to be operational by the end of November
- Project expected to be completed on budget
- Stage 1 production of 17,500tpa, high margin/low cost operation
- Large world-class JORC/NI 43-101 resource (6.4mt LCE, 19.3mt KCL, 1.85mtB) enables significant expansion potential
- Sustainable long life project -Feasibility Study considered 40 yrs with only 15% resources extracted
- Battery grade lithium carbonate has been produced at the Olaroz pilot plant since January 2011
- Key partnerships with Toyota Tsusho Corporation and Jujuy provincial government mining company

Borax Argentina operations

- Substantial JORC resource and historical estimates
- Long standing business (50+ years operation) undergoing rejuvenation. NPAT positive in FY14
- Over 40,000tpa production of boron chemicals & mineral concentrates
- Large asset base of 3 mines, 2 concentrate plants and a refinery operation with significant upside from existing assets
- Boron used in fertiliser as a micronutrient, glass, ceramic frits, glazes and tile bodies, wood treatments, polymer additives, detergents, soaps and personal care products (buffering, source of active oxygen)
- Owner of mining properties of a number of lithium exploration projects with a royalty stream (Cauchari, Diablillos and Sal deVida)

Portfolio of Argentinian regional projects with attractive potential

- Proximity of Cauchari & Salinas Grandes brines to Olaroz provides expansion potential & execution flexibility

Long-term lithium, borates and potash markets look very strong

- Annual lithium market demand growth of approximately 10% forecast
- Continued growth in electric transport and lithium battery use has the potential for large demand growth
