GXM Appointment of Specialty Metals Trader to Advisory Board

20.11.2014 | Marketwired

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Nov 20, 2014) - Geodex Minerals Ltd. (TSX VENTURE:GXM)(FRANKFURT:G2W), (the "Company" or "Geodex") is pleased to announce that it has appointed Evan (Dong) Chen to its advisory board. Concurrent with this appointment the company has placed 600,000 Units with Mr Chen, each Unit consists of one share of the company and one half warrant, at a price of 5 cents per unit. The warrants are exercisable within 24 months from closure of the placing at a strike price of 7 cents. This issue raises $30,000 which shall be employed for general corporate purposes. No finder's fees are associated with this placement. Closing of the Placement is subject to the receipt of regulatory approval, including approval of the TSX.

Evan (Dong) Chen is the Founder and President of Fredstone Materials Inc., New Brunswick, Canada, a company providing marketing/consulting service for mining investments and metal/mineral trading, as well as the Canadian broker of China based mining exchange TIMEx. Previously Mr. Chen was Managing Director of Dlrow (Tianjin) Co., Ltd., a Chinese trading firm for various of metal/mineral materials, and also from 2006 till 2012 the Exclusive Representative Agent of US based Recapture Metals Inc (now a subsidiary of Molycorp). He holds a Bachelor's degree with a major in metal materials processing engineering.

Geodex's CEO, Christopher Ecclestone, commented, "We are very pleased to bring a veteran trader in the specialty metals space onto our team and look forward to the benefits that might accrue from having a vector into the Chinese specialty metals space for both Antimony and Tin."

About Geodex

Geodex is a mineral resource company focused on critical metal projects, particularly Antimony and Tin. Projecting from its traditional base in Canada's Maritime Provinces the company intends on pursuing opportunities in these metals both there and in Spain, around the Mediterranean Basin and in other traditional mining regions by aggregating past-producing and producing mines in these metals.
