

# Rockcliff Completes Geophysical Review and Identifies High Priority Drill Targets near High Grade Talbot Copper Deposit and Closes First Tranche of Private Placement

09.12.2014 | [Marketwired](#)

TORONTO, Dec 9, 2014 - [Rockcliff Resources Inc.](#) ("Rockcliff" or the "Company") (TSX VENTURE:RCR) wishes to report it has completed a historical geophysical review surrounding the high grade Talbot Copper Deposit. A preliminary total of six (6) high priority geophysical targets were clearly identified, of which four (4) of the targets are drill ready and will be tested in a planned drill program in the New Year. The Talbot Property is located in mining friendly Manitoba and all necessary permits are presently in place. Also, the Company is pleased to report that it has closed the first tranche of the private placement announced on November 14, 2014 (the "Offering") with the sale of 916,667 flow-through units ("FT Units") and 4,184,000 working capital units ("WC Units") for gross proceeds of \$264,200.

Rockcliff's President & CEO Ken Lapierre stated, "The successful geophysical review at Talbot has identified numerous targets deserving of a significant campaign of drilling to determine their mineral significance. Our private placement has gotten off to a great start and we look forward to completing the financing so that we can begin a very promising program of potential copper discoveries near our existing high grade Talbot Deposit. The Talbot Deposit was discovered by geophysics and the fact that VMS deposits like to form in clusters bodes well for these nearby untested targets."

Please visit the Company's website at [www.rockcliffresources.com](http://www.rockcliffresources.com) to view the Talbot Geophysical Report.

The Company's present financing consists of up to 15,000,000 FT Units of the Company priced at \$0.06 per FT Unit, for gross proceeds of up to \$900,000. Each FT Unit consists of one (1) flow-through common share of the Company priced at \$0.06 and one (1) common share purchase warrant (a "Warrant"). Each Warrant entitles the holder to acquire an additional common share for three (3) years from the closing of the Offering at a price of \$0.10 per common share. It also consists of up to 12,000,000 WC Units of the Company at a price of \$0.05 per WC Unit, for gross proceeds of up to \$600,000. Each WC Unit consists of one (1) common share of the Company priced at \$0.05 and one (1) common share purchase warrant (a "WC Warrant"). Each WC Warrant entitles the holder to acquire an additional common share for three (3) years from the closing of the Offering at a price of \$0.075 per common share.

All securities issued under this tranche are subject to a hold period expiring on April 9, 2015.

The Company will leave the Offering open until the earlier of the completion of the Offering and December 22, 2014.

## Rockcliff Resources Inc.

[Rockcliff Resources Inc.](#) is a Canadian resource exploration company focused on discovery and resource growth of its high-quality mineral properties at its Snow Lake Project. Rockcliff presently controls the Snow Lake Project in central Manitoba, totalling in excess of 400 km<sup>2</sup>. The project includes two (2) VMS high grade copper rich NI 43-101 Resources (T-1, Rail), two (2) historic high grade VMS copper deposits (Lon and Talbot), the T-2 Copper Zone (Tower), numerous untested geophysical anomalies and several additional properties with VMS potential (Freebeth, Dickstone North). Rockcliff also owns a zinc-silver rich NI 43-101 Resource (Shihan) in Ontario.
