

Athabasca Nuclear Corporation - News Release

12.01.2015 | [The Newswire](#)

Calgary, AB / TNW-ACCESSWIRE / January 12, 2015 [Athabasca Nuclear Corp.](#) (TSX-V: ASC) ("Athabasca Nuclear" or the "Corporation") is pleased to provide comment on its mineral tenure position in the Western Athabasca Basin and announce the release of its January 2015 corporate presentation.

"The resource estimate released on January 9, 2015 by [Fission Uranium Corp.](#) for their Triple R uranium deposit affirms to our company as to why we positioned into the underexplored Western Athabasca some time ago and at significant-scale. With a district-size mineral tenure position in the region which is supported by third-party exploration funding at our flagship Preston Uranium Project, we believe that Athabasca Nuclear is well-positioned in the area. I am also pleased to report availability of an updated corporate presentation on our website," stated Ryan Kalt, Chairman and Chief Executive Officer of the Corporation.
