

# Strategic Metals Acquires a New Property Near the Discovery of Polymetallic Boulders by Visible Gold Mines

03.02.2015 | [Marketwired](#)

MONTREAL, QUEBEC--(Marketwired - Feb 3, 2015) - **Canada Strategic Metals Inc.** ("Strategic Metals" or the "Company") (TSX VENTURE:CJC)(FRANKFURT:YXEN)(OTCBB:CJCFF) is very pleased to announce the acquisition, by map designation, of a new property for its gold-bearing potential. The new 2,114-hectare property is 100% owned by Canada Strategic Metals and is located about 5 kilometres northwest of the "167 extension property", where Visible Gold Mines recently discovered several boulders containing gold, silver, copper and zinc mineralization.

The property was acquired by map designation following a compilation of all the information available from the Ministry of Energy and Natural Resources and an assessment of the glacial train aimed at identifying the potential in-situ source of the boulders identified by Visible Gold Mines. The compilation also indicated that the property covers a strong SW-NE magnetic anomaly crossed by a NW-SE major structure. The junction of these two structures is located right in the middle of the newly-acquired property, named the "NEW GOLD" project. The Company plans to do further compilation work on the project and set a work program for the summer of 2015.

A location map for the recently acquired New Gold property can be found on the Company's web site, at: [www.csmetals.ca](http://www.csmetals.ca).
