

CALGARY, ALBERTA--(Marketwired - Mar 25, 2015) - Troymet Exploration Corp. (TSX VENTURE:TYE) ("Troymet" or the "Company") reports that New Gold Inc. (TSX:NGD) ("New Gold") has completed its committed expenditure of \$1,500,000 on mineral exploration on the Key property in British Columbia. In December 2013, Troymet completed the sale of its 100% interest in the Key property to New Gold. As part of the transaction, New Gold committed to spend \$1,500,000 on the Key property, with a minimum of \$500,000 of expenditures on or before December 31, 2014, and the balance of \$1,000,000 of expenditures on or before December 31, 2018.

Kieran Downes, President and CEO of Troymet, commented: "We view New Gold's decision to accelerate the expenditure schedule such that the entire, committed \$1.5 million was spent in 2014 as extremely positive for the Key property. New Gold activities included a discovery of high grade porphyry-style mineralization three kilometres south of its main Blackwater deposit and within 1 kilometre of the Key property."

Troymet retains a 2% net smelter returns royalty ("NSR") on the Key property, of which half can be purchased by New Gold at any time for \$2,000,000 cash, thereby reducing the NSR royalty to 1%.

The Key property adjoins the Blackwater gold-silver deposit which is currently in the permitting phase:

- Proven and Probable mineral reserves: 8.17 million ounces gold & 60.8 million ounces silver*
- Measured and Indicated mineral resources (exclusive of mineral reserves): 1.07 million ounces gold & 12.7 million ounces silver*
- Inferred mineral resources: 0.29 million ounces gold & 1.5 million ounces silver*
