

Brossard, Quebec / TheNewswire / April 15th, 2015 [Nippon Dragon Resources Inc.](#) (the "Corporation" or "Nippon") (TSX-V Symbol: NIP), is pleased to announce the closing of a first tranche of the non-brokered private placement. This first tranche is for 6,077,936 units of the Corporation at a price of \$0.08 per unit (the "Units"), for aggregate gross proceeds of \$486,234.90. Each unit consists of one common share in the share capital of the Corporation (a "Common Share") and one warrant of the Corporation (a "Warrant"). Each warrant entitles the holder thereof to purchase one additional common share in the share capital of the Corporation at a price of \$0.12 per common share for a period of 24 months following the closing of the private placement.

Two insiders of the Corporation subscribed for a total of 950,00 units as part of the Common Share Private Placement (the "Insider Participation"), constituting a "related party transaction" as defined under Multilateral Instrument 61-101 - Protection of Minority Security Holders in Special Transactions ("MI 61-101"). The Insider Participation is exempt from the valuation and minority shareholder approval requirements of MI 61-101 by virtue of the exemptions contained in Sections 5.5(a) and 5.7(1)(a) of MI 61-101 based on that neither the fair market value of such Insider Participation nor the consideration paid by such person exceeds 25% of Nippon's market capitalization. Nippon has not filed a material change report 21 days prior to the closing of the Common Share Private Placement as participation of the insider had not been established at that time.

All securities issued in connection with the Private Placement are subject to a four month and one-day hold period from the date of issuance, expiring on August 16th, 2015. The Corporation intends to use the net proceeds of the Private Placement for general corporate purposes and working capital for adequate deployment of the thermal fragmentation technology on different projects at the national and international level.

Nippon is active in the exploration and the development of gold resources in Quebec. The Corporation holds a gold property with resources recognised in accordance with NI43-101, a modular treatment plant and also an exclusive license for the Thermal Fragmentation mining method.

The company's growth strategy is based on:

- -The development of its gold deposits with the objective of producing revenue from its operations;
- Increasing the value of its mining assets by prioritizing the exploration targets; and
- The commercialisation and employment of its thermal fragmentation technology.
