

# Rum Jungle Resources Limited: PAC Partners Investment Conference Presentation

28.04.2015 | [ABN Newswire](#)

Perth, Australia (ABN Newswire) - [Rum Jungle Resources Ltd.](#) (ASX:RUM) is an Australian listed company with both phosphate and sulphate of potash (SOP) resources. These minerals are essential for efficient agriculture and are critical components of the global food supply value chain.

- Over the last four years the company has discovered and evaluated the world class Ammaroo Phosphate Project located in the Northern Territory. A preliminary feasibility study has been completed with compelling results
- Built a portfolio of SOP projects based on geologically scarce potassium and sulphate brine resources. SOP is a premium potash fertiliser (SOP prices currently (~US\$680 - A\$880/t) with limited supply available globally. SOP produced from brines is an organic fertiliser
- The Karinga Lakes project is the most advanced SOP project and a scoping study has been completed. Demonstrates the potential for a small scale, low capital start-up operation producing either SOP or an intermediate product, potassium magnesium sulphate.
- Proximity to existing transport infrastructure providing access to markets in Australia, Asia and Africa
- Both key fertiliser ingredient projects have the potential to be 1st-2nd quartile of global cost curves at an appropriate scale. Processing routes defined using existing and well established technology minimising risks
- Clear strategic path to develop both phosphate and sulphate of potash projects. Capital is the required ingredient
- A formal investment process is now underway to fund bankable feasibility studies. Roadshows have recently been conducted in India, China, Dubai and North America and a data room has been opened.
