About Pershimco Resources Inc.

[Pershimco Resources Inc.](#) (TSX VENTURE:PRO)(FRANKFURT:BIZ) is a mineral exploration and development company with a near-term gold oxide production scenario and a copper-gold porphyry target at its 100%-owned Cerro Quema Project in Panama. Cerro Quema's concession boasts paved road access, no indigenous groups and the most favorable climate in the country. Based on the results from a recently released pre-feasibility study, the Company's extraction-permitted gold oxide project has a pre-tax NPV of \$165 million US with a pre-tax internal rate of return of 46.8% (\$110 million US after tax with an after-tax rate of return of 33.7%), supported by great recovery rates (86%) and lowest quartile all-in sustaining cash cost of \$631/oz. Led by a skilled management team with a proven track record of building successful operating mining facilities in the Americas, Pershimco's project is scheduled to be in production in 2016. Additionally, the Cerro Quema Project has proven to have significant exploration upside with resource expansion potential in over 12 oxide targets identified along a 17km trend as well as porphyry indicators along a 12km strike length that suggests a copper-gold porphyry system is at depth. With strong shareholder support, Pershimco aims to achieve cash flowing status in the near term to continue uncovering the value of Cerro Quema. Please refer to the Cerro Quema Project - Pre-Feasibility Study on the La Pava and Quemita Oxide Gold Deposits, available on the company's website, and filed on SEDAR on August 22, 2014 as well as to the press release of July 8, 2014.
