About Focus

Focus is an exploration and development company with two main assets, both located in Peru: the Bayovar 12 phosphate deposit located in the Sechura district of northern Peru, and the Aurora porphyry copper-molybdenum property located in the Department of Cusco, which it is developing in a joint venture with Daewoo International Corporation.

Phosphate rock is a raw material for fertilizers and vital to world food production. Focus is acquiring and developing quality phosphate projects in Latin America where the discovery and development of new deposits is becoming increasingly important given the growing demand and limited local supply of phosphate for fertilizer production.
