

VANCOUVER, BC--(Marketwired - Jun 11, 2015) - [Pure Energy Minerals Ltd.](#) (TSX VENTURE: PE) (FRANKFURT: A111EG) (OTC PINK: HMGLF) (the "Company" or "Pure Energy") is pleased to announce that Professor Pierre Kennepohl of the University of British Columbia ("UBC") and Pure Energy have received a \$25,000 Engage Grant from the Natural Sciences and Engineering Research Council of Canada ("NSERC") to collaboratively study aspects of selective lithium removal from brines, and also how lithium is exchanged between brines and lithium-containing solids in samples from Pure Energy's Clayton Valley Property.

Robert Mintak, Pure Energy CEO commented, "Pure Energy is very pleased to be a partner with UBC and Professor Kennepohl's world-class research team on this NSERC Engage Grant. The work will be performed on samples of soil and brine from Pure Energy's Clayton Valley Lithium project, and will add to the Company's ongoing technology evaluation program and the characterization of the lithium resource present within the Clayton Valley Basin. Of special interest to the Company is the study of the regenerative potential of the resource and how lithium can potentially be transferred into brine from the lithium-enriched rocks and sediments that are present within the Clayton Valley basin. We hope that this is the start of a long and productive relationship with the team at UBC."

About Pure Energy:

Pure Energy is an integrated lithium mining and processing developer with a focus on green 'cradle to cradle' lifecycle solutions for lithium supply in North America. Pure Energy is currently focused on the advancement of our prospective Clayton Valley Lithium Brine Project, located in the same basin as and contiguous to the only producing lithium operation in the United States, Albemarle's Silver Peak lithium brine mine.

On behalf of the Board of Directors

"Robert Mintak"

Chief Executive Officer
