SASKATOON, SK, July 16, 2015 /CNW/ - Claude Resources Inc. ("Claude" and or the "Company") reported that, as a result of a reduced risk along with favourable and improving weather conditions, it has commenced preparations to resume all operating activities at the Seabee Gold Operation in northern Saskatchewan. The temporary suspension of underground mining operations and removal of non-essential personnel was a precautionary decision to ensure the safety of its personnel from the threat of heavy smoke and ash from a local forest fire. The Company will continue to closely monitor the forest fire situation to ensure the safety and health of its employees.

The Company's timeline to resume full underground production is expected to be early next week. Personnel are scheduled to return to site starting tomorrow, July 17, 2015, and continuing through to July 20, 2015. During the temporary suspension, the mill processed approximately 850 tonnes per day from the surface stockpile. The current stockpile is approximately 8,500 tonnes and it will continue to be processed until underground mining operations resume. At this time, the Company expects to meet its production guidance for the year.

Brian Skanderbeg, President and CEO commented, "We are pleased that we are now able to safely resume mining operations at the Seabee Gold Operation. We would like to thank all those who have supported and helped in our efforts to manage the forest fire. Also, I would like to specifically thank our dedicated staff who remained on site and worked tirelessly to implement protective measures to ensure the safety of our employees and facilities."
