

VANCOUVER, BC--(Marketwired - Jul 30, 2015) - [Pure Energy Minerals Ltd.](#) (TSX VENTURE: PE) (FRANKFURT: A111EG) (OTC PINK: HMGLF) (the "Company" or "Pure Energy") is pleased to announce that its common shares have commenced trading on the OTCQB Marketplace under the symbol "HMGLF." Pure Energy's common shares will continue to trade on the TSX Venture Exchange under the symbol "PE." Pure Energy expects to benefit from being listed on the OTCQB by gaining greater exposure and liquidity in the United States, where Pure Energy's Clayton Valley lithium brine project is located.

Pure Energy CEO Robert Mintak commented: "We are pleased to now be listed on the OTCQB Marketplace. Pure Energy will now be trading on three international platforms: TSX Venture (Canada) OTCQB (USA) and the Xtera Platform (Germany). Given that our Lithium Brine project is located in Clayton Valley, Nevada we believe this listing will create greater visibility with US investors and that these multiple listings/quotation platforms will allow for a much larger potential shareholder base and enhanced liquidity."

Trading on the OTCQB does not involve the issuance of new common shares of the Corporation or any other securities. The common shares of the Corporation that are currently issued and outstanding, and trading on the Toronto Venture Exchange, may now also be traded through the OTCQB.

About Pure Energy:

Pure Energy is an integrated lithium mining and processing developer with a focus on green 'cradle to cradle' lifecycle solutions for lithium supply in North America. Pure Energy is currently focused on the advancement of our prospective Clayton Valley, Nevada, Lithium Brine Project, located contiguous and to the southeast of the only producing lithium mine in the United States, Albemarle's Silver Peak lithium brine mine.

On behalf of the Board of Directors
"Robert Mintak"
Chief Executive Officer
