

MONTREAL, QUEBEC--(Marketwired - Aug 10, 2015) - DIOS EXPLORATION (TSX VENTURE:DOS) reports that the first drilling campaign of HEBERTO GOLD has been completed with ten holes totalling some 2000 meters.

HEBERTO STYLE gold mineralization was intersected in several holes from ten meters to tens of meters (true width), that is sheared, silicified, pyritized, biotitized and potassic feldspar altered mineralized intercepts.

This James Bay drill campaign near EM-1 was undertaken under the field supervision of Harold Desbiens and Marie-José Girard, both 43-101 Qualified Persons. A budget has already been allocated to resume drilling in the days to come with some other 1000 meters.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
