About Parkside Resources Corporation

Parkside is a Canadian-based mineral exploration company dedicated to building shareholder value through focused exploration, discovery, and development of high-quality precious and base metal projects. Parkside is presently advancing the Forester Lake Gold Property, located approximately 100 kms north of Pickle Lake, Ontario and roughly 35 kms southeast of Goldcorp's Musselwhite gold mine, which is a highly prospective gold-in-iron-formation property in northwestern Ontario. Exploration to date has returned significant assay results and there is potential for discovery of economic iron-formation-hosted gold mineralization. Incorporated in 2005, Parkside is a reporting issuer in the provinces of British Columbia and Alberta, the common shares of which are listed for trading on the NEX Exchange under the symbol PKS.H. Trading in the shares is currently suspended due to a cease trade order issued on February 3, 2015, for failure to file financial statements.
