

TORONTO, Aug. 19, 2015 /CNW/ - Alacer Gold Corp. ("Alacer" or the "Corporation") [TSX: ASR and ASX: AQQ] is pleased to announce that the Çöpler Mine has produced its one millionth ounce of gold today. This significant milestone was achieved approximately four and half years after pouring its first ounce of gold on December 22, 2010. Çöpler's first million ounces were processed from 33.6 million tonnes of ore grading at an average of 1.6 grams per tonne with average cash costs of \$401 per ounce.

Rod Antal, Alacer's President and Chief Executive Officer, stated, "Today's one millionth ounce represents an important accomplishment for the Çöpler Mine and its employees. I am most proud of the fact that this milestone was attained while recording almost 7 million man hours worked without a lost time injury. This is a tangible reflection of the world class nature of the Çöpler Mine and its employees, whose commitment and dedication will ensure the safe and successful production of Çöpler's next million ounces."

About Alacer

Alacer is a leading intermediate gold mining company, with an 80% interest in the world-class Çöpler Gold Mine in Turkey operated by Anagold Madencilik Sanayi ve Ticaret A.S. ("Anagold") owned 80% by Alacer and 20% by Lidya Madencilik Sanayi ve Ticaret A.S. ("Lidya Mining"). The Corporation's primary focus is to maximize portfolio value, maximize free cash flow, minimize project risk and, therefore, create maximum value for shareholders.

Alacer is actively pursuing initiatives to enhance value beyond the current mine plan:

- Çöpler Oxide Production Optimization – expansion of the existing heap leach pad to 58 million tonnes remains on track. Approximately 70% of the Heap Leach Pad Phase 4 expansion area is within the existing mine permit area and that portion is currently under construction. The remaining 30% of the area necessary for final construction in 2016 requires an additional land use permit that is currently awaiting final approval. Engineering for a new heap leach pad site to the west of the Çöpler Mine is progressing. The Corporation continues to evaluate opportunities to optimize and extend oxide production beyond the current reserves.
- Çöpler Sulfide Project – the Corporation continues detailed engineering and procurement of long-lead time items progressively. The Project will deliver medium-term growth with robust financial returns and adds an additional 22 years of production. The Environmental Impact Assessment was approved in December 2014, and land use permits have progressed through the regulatory process and are awaiting final approval. Receipt of land use permits is required to begin Project construction. The Project is currently on track for commissioning at the end of 2017. The Sulfide Project will bring Çöpler Life-of-Mine gold production to 3.9 million ounces at industry low All-in Sustaining Costs¹ averaging \$637 per ounce as detailed in the updated Technical Report dated March 27, 2015.
- The Corporation continues to pursue opportunities to further expand its current operating base to become a sustainable multi-mine producer with a focus on Turkey. The structured and focused exploration efforts in the Çöpler District to locate additional oxide deposits, as well as in other regions of Turkey are progressing. Drilling and metallurgy work to advance the Dursunbey project in western Turkey will continue in 2015.

Detailed information regarding the Çöpler Sulfide Project can be found in the Technical Report available on SEDAR at www.sedar.com and on the Corporation's website.

Alacer is a Canadian corporation incorporated in the Yukon Territory with its primary listing on the Toronto Stock Exchange. The Corporation also has a secondary listing on the Australian Stock Exchange where CDIs trade.

Cautionary Statements

Except for statements of historical fact relating to Alacer, certain statements contained in this press release constitute forward-looking information, future oriented financial information, or financial outlooks (collectively "forward-looking information") within the meaning of Canadian securities laws. Forward-looking information may be contained in this document and other public filings of Alacer. Forward-looking information often relates to statements concerning Alacer's future outlook and anticipated events or results and, in some cases, can be identified by terminology such as "may", "will", "could", "should", "expect", "plan", "anticipate", "believe", "intend", "estimate", "projects", "predict", "potential", "continue" or other similar expressions concerning matters that are not historical facts.

Forward-looking information includes statements concerning, among other things, preliminary cost reporting in this press release, production, cost and capital expenditure guidance; ability to expand the current heap leach pad, development plans for processing sulfide ore at Çöpler; results of any gold reconciliations; ability to discover additional oxide gold ore, the generation of free cash flow and payment of dividends; matters relating to proposed exploration, communications with local stakeholders and community relations; negotiations of joint ventures, negotiation and completion of transactions; commodity prices; mineral resources, mineral reserves, realization of mineral reserves, existence or realization of mineral resource estimates; the development approach, the timing and amount of future production, timing of studies, announcements and analysis, the timing of construction and development of proposed mines and process facilities; capital and operating expenditures; economic conditions; availability of sufficient financing; exploration plans; receipt of regulatory approvals and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, regulatory and political matters that may influence or be influenced by future events or

conditions.

Such forward-looking information and statements are based on a number of material factors and assumptions, including, but not limited in any manner to, those disclosed in any other of Alacer's filings, and include the inherent speculative nature of exploration results; the ability to explore; communications with local stakeholders and community and governmental relations; status of negotiations of joint ventures; weather conditions at Alacer's operations, commodity prices; the ultimate determination of and realization of mineral reserves; existence or realization of mineral resources; the development approach; availability and final receipt of required approvals, titles, licenses and permits; sufficient working capital to develop and operate the mines and implement development plans; access to adequate services and supplies; foreign currency exchange rates; interest rates; access to capital markets and associated cost of funds; availability of a qualified work force; ability to negotiate, finalize and execute relevant agreements; lack of social opposition to the mines or facilities; lack of legal challenges with respect to the property of Alacer; the timing and amount of future production and ability to meet production, cost and capital expenditure targets; timing and ability to produce studies and analysis; capital and operating expenditures; economic conditions; availability of sufficient financing; the ultimate ability to mine, process and sell mineral products on economically favorable terms and any and all other timing, exploration, development, operational, financial, budgetary, economic, legal, social, regulatory and political factors that may influence future events or conditions. While we consider these factors and assumptions to be reasonable based on information currently available to us, they may prove to be incorrect.

You should not place undue reliance on forward-looking information and statements. Forward-looking information and statements are only predictions based on our current expectations and our projections about future events. Actual results may vary from such forward-looking information for a variety of reasons including, but not limited to, risks and uncertainties disclosed in Alacer's filings at www.sedar.com and other unforeseen events or circumstances. Other than as required by law, Alacer does not intend, and undertakes no obligation to update any forward-looking information to reflect, among other things, new information or future events.

¹ All-in Sustaining Costs are a non-IFRS financial performance measure with no standardized definition under IFRS. For further information and a detailed reconciliation, please see the "Non-IFRS Measures" section of the MD&A for March 30, 2015.
