About Copper Mountain Mining Corporation:

Copper Mountain's flagship asset is the 75% owned Copper Mountain mine located in southern British Columbia near the town of Princeton. The Company has a strategic alliance with Mitsubishi Materials Corporation who owns the remaining 25%. In 2014, the Company installed the world's largest cone crusher for secondary stage crushing that was completed in the summer on budget and on schedule, as was the original \$438 million development. For the fiscal year 2014, the Company completed fourteen shipments of concentrate containing approximately 81 million pounds of copper to Japan for smelting and recorded revenues, net of smelter charges and pricing adjustments, of \$266 million; cash flow of \$47.2 million and realizing a gross profit of \$32 million. The 18,000 acre site has a large resource of copper that remains open laterally and at depth. The mine has significant exploration potential that will need to be explored over the next few years to fully appreciate the property's full development potential. Additional information is available on the Company's web page at www.CuMtn.com.
