

DENVER, COLORADO and BRISBANE, AUSTRALIA and VANCOUVER, BRITISH COLUMBIA--(Marketwired - Sep 3, 2015) - Strata-X Energy (TSX VENTURE:SXE)(ASX:SXA) -

- Webster Drilling is mobilizing drilling rig for the Kuhlig #1 well.
- Kuhlig #1 is a 12 Km step-out appraisal well of the Burkett 5-34 horizontal well that reached 300 BOPD.
- Strata-X expects the well to be spudded on September 10, 2015 following the Labor Day weekend.

Drilling Update

Strata-X Energy has received notice from the drilling contractor, Webster Drilling, that they have begun mobilization of their drilling rig to the Kuhlig #1 location, the second well in the Company's Lingle Oil Project. The Kuhlig #1 vertical well is a 12 km step-out of the first completed Lingle horizontal well, Burkett 5-34, where peak production rates of 300 barrels of oil per day were achieved. It is anticipated the Kuhlig #1 well will be spudded following the USA Labor Day holiday on September 10, 2015

The Burkett 5-34 was a "Proof of Concept" well that successfully proved the Lingle can be drilled and completed horizontally and is capable of commercial oil production. Although this first horizontal test accomplished many of the pre-drill targets, Strata-X expects even better results from the next horizontal well, which will be designed with twice the horizontal leg length and an improved completion method compared to the Burkett 5-34 well.

Kuhlig #1 is an low cost, vertical well that will core and pressure test the Lingle to acquire important reservoir data required to design the proposed Raccoon Creek #1 horizontal well. A core will be taken from the bottom of the New Albany shale through the primary reservoir of the Lingle formation. Confirmation of oil saturation, reservoir thickness and porosity will be key data obtained. The pressure test will be instrumental in the design of future horizontal completion methods as Strata-X fine-tunes the approach to optimizing commercial oil production.

The Kuhlig #1 is expected to intersect up to 16 feet of the Lingle reservoir, and to encounter higher initial reservoir pressure and oil saturations than the Burkett well. It will be drilled a short distance from a historical well that has log data indicating oil saturations in the reservoir. The subsequent Raccoon Creek #1 horizontal well will be drilled up-dip from the Kuhlig #1 location and toward the historical well.

The drilling of Raccoon Creek #1 is tentatively scheduled for early 2016, subject to funding. Strata-X is investigating hybrid methods to fund future horizontal wells, which may include joint ventures. Strata-X's 100% ownership of the projects offers flexibility on the later funding options.

Summary of the Lingle Oil Project

The Lingle Oil Project is targeting light gravity sweet oil from the Devonian-aged Lingle Formation. Estimates of Petroleum Initially In Place under the Company's acreage is approximately 240 million barrels.¹ It is expected that a recovery factor of at least 10% can be achieved in the Lingle Reservoir. ASX disclosure note - 5.28.2 - The estimated quantities of petroleum that may potentially be recovered by the application of a future development project(s) relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration appraisal and evaluation is required to determine the existence of a significant quantity of potentially moveable hydrocarbons.

Tim Hoops, the Company's President, stated, "the Kuhlig #1 and the subsequent Raccoon Creek #1 horizontal well are expected to have nearly twice the reservoir thickness, more than twice the horizontal length and have much better reservoir pressure than our pioneering Burkett 5-34 horizontal well. The combination of these favorable factors should provide us with much improved performance and position us for development of this exciting project"

About Strata-X

Strata-X is a Denver, Colorado (USA) based company and is engaged in the business of oil and gas exploration and development with a variety of exploration opportunities in North Dakota, Illinois, California, Texas and Western Australia and production and development opportunities in California. Strata-X has 166,895,227 common shares outstanding and trades under the symbol "SXE" on the TSX-V and "SXA" on the ASX.

FORWARD-LOOKING STATEMENTS

This news release contains forward-looking statements, which relate to future events or future performance, including but not limited to, the completion and size of the Placement, receipt of regulatory approvals and timing thereof, the Corporation's business strategies and plans for the use of such Placement proceeds, capital expenditure programs and estimates relating to timing and costs, and reflect management's current expectations and assumptions, including, but not limited to the timing and receipt of necessary regulatory approvals and third party approvals and completion of the Placement and stability of general economic and financial market conditions. The use of any of the words "anticipate", "continue", "estimate", "expect", "may", "will", "project", "should", "believe", and similar expressions is intended to identify forward-looking statements. Such forward-looking statements reflect management's current beliefs and are based on assumptions made by and information currently available to the Company. Readers are cautioned that these forward-looking statements are neither promises nor guarantees, and are subject to risks and uncertainties, including imprecision in estimate capital expenditures and operating expenses, stock market volatility, general economic and business conditions in North America and globally, risks associated with liquidity and capital resource requirements, that may cause future results to differ materially from those expected and the forward-looking statements included in this news release should not be unduly relied upon. See also "Risks Factors" in the Company's Annual Information Form dated September 25, 2014 available on SEDAR at www.sedar.com. Those factors are not, and should not be construed as being exhaustive. These forward-looking statements are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances save as required under applicable securities legislation. This news release does not constitute an offer to sell securities and the Company is not soliciting an offer to buy securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of such jurisdiction.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
