

VANCOUVER, BC / ACCESSWIRE / September 9, 2015 / [Minaurum Gold Inc.](#) (TSXV: MGG) ("Minaurum") is pleased to report it has regained control of the Santa Marta VMS copper-gold project in Oaxaca, Mexico from [Lowell Copper Ltd.](#) ("Lowell"). Due to current market conditions, Lowell elected to withdraw from its option which was initiated in December 2013 (see Minaurum Press Release dated December 20, 2013).

Santa Marta is a copper-gold bearing volcanogenic massive sulfide system (VMS) which is exposed at the surface along a 700 meter strike length and remains untested by modern exploration methods. Geologic expert Dr. James Franklin considers the system to have geologic features characteristic of many important large VMS districts (see Minaurum Press Release dated June 19, 2013).

"We are pleased to have the Santa Marta project returned to us with both the drill permitting process well underway and a significant portion of the permitting costs already incurred. We would like to thank Lowell for their interest in the Santa Marta project and look forward to their continued involvement with Minaurum as long-term shareholders," stated President and CEO, Darrell Rader.

Minaurum Gold is a gold-copper explorer focused on its Vuelcos Del Destino project in the Guerrero Gold Belt, Mexico. For more information, please visit our website at www.minaurum.com and our YouTube Minaurum Video Channel (<http://www.minaurum.com/s/VideoGallery.asp>).

ON BEHALF OF THE BOARD
