

QUEBEC CITY, QUEBEC--(Marketwired - Sep 10, 2015) - [Nemaska Lithium Inc.](#) ("Nemaska Lithium" or the "Corporation") (TSX VENTURE:NMX) (OTCQX:NMKEF) is pleased to announce that it will be joining battery industry experts and leaders as a featured speaker at the Benchmark Intelligence Battery Raw Materials & Supply Chain 20/20 World Tour 2015. Mr. Guy Bourassa President and CEO of Nemaska Lithium will be speaking at the London, New York and Toronto legs of the world tour. Mr. Bourassa will be discussing Nemaska Lithium's plan to build a world class lithium mine and Hydromet plant in Quebec, Canada. The Company intends to produce high quality low cost lithium hydroxide and lithium carbonate primarily for the emerging battery markets.

Joining Mr. Bourassa on the tour will be a number of lithium battery industry experts including: Simon Moore of Benchmark Intelligence; Chris Berry, Founder and President, House Mountain Partners and Sam Jaffe, Managing Director, Cairn Energy Research Advisors (USA) to name a few. Conference presenters will discuss the role of critical minerals in batteries, how much graphite, lithium and cobalt will be needed and when, timing of electric vehicles and utility storage and opportunities in this emerging market.

The conference is expected to be attended by institutional fund managers, bankers, retail brokers and retail investors, with the New York conference being chaired by UBS. Space is limited for these conferences however limited spaces may still be available. Registration is free for attendees. For more information visit the links below:

New York - 17 September 2015 (click to attend <http://www.benchmarkminerals.com/newyork-2015.html>)

Toronto - 24 September 2015 (click to attend <http://www.benchmarkminerals.com/toronto-2015.html>)

About Nemaska Lithium

Nemaska Lithium intends to become a lithium hydroxide supplier and lithium carbonate supplier to the emerging lithium battery market that is largely driven by electric vehicles, cell phones, tablets and other consumer products. The Corporation is developing in Quebec one of the most important spodumene lithium hard rock deposit in the world, both in volume and grade. The spodumene concentrate produced at Nemaska Lithium's Whabouchi mine will be shipped to the Corporation's lithium compounds processing plant to be built in Shawinigan, Quebec. This plant will transform spodumene concentrate into high purity lithium hydroxide and carbonate using the proprietary methods developed by the Corporation, and for which patent applications have been filed.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

The statements herein that are not historical facts are forward-looking statements. These statements address future events and conditions and so involve inherent risks and uncertainties. Actual results could differ from those currently projected. The Corporation does not assume the obligation to update any forward-looking statement.
