

Vancouver, BC / TheNewswire / September 28 2015 - [Cardiff Energy Corp.](#) (the "Company") (TSX-V: "CRS", Frankfurt: "C2Z.F", US Pinksheets: "CRRDF") is pleased to provide a corporate and drilling update on the status of Clayton #1H.

As per the company's press release dated September 8, 2015, with the services of a new drilling contractor engaged, work began to remedy problems at the well site. Significant efforts were undertaken to prepare the hole to free a stuck reamer which presented a major technical problem to completing the well. The Company was pleased to announce that on September 4, 2015 the reamer was successfully fished out of the hole. The next step was to re-condition the Clayton #1H in preparation of setting casing. However, before commencing re-conditioning of the Clayton #1H pumps needed to be replaced and setup and assembly of new steel pits and shale shaker assembly was needed.

The Company is now pleased to report that the Operator has successfully re-entered the hole and cleaned and re-conditioned the Clayton #1H to depth. The Operator is in the process of reaming the hole to total depth in preparation for setting casing. As of Sunday evening September 27, 2015 reaming has reached 4250 ft with roughly 600ft to go. Once reaming is completed the Clayton #1H will be immediately cased, after which preparations and commencement of 5 days of horizontal drilling will take place.

To date, the Company has met all cash calls based on their 65% Working Interest ("WI") and has funded in excess of \$1,050,000 USD of the estimated of \$1,700,000 USD Authorization For Expenditure ("AFE") for completion to the tanks of the Clayton #1H. The Company will be providing additional updates as they become available including; casing of well, Joint Venture funding, commencement and completion of horizontal drilling and initial flow testing.

Additionally, the Company would like to announce that negotiations are underway on new lease acquisitions and drilling opportunities.

Furthermore, the Company has reserved 2,000,000 incentive stock options for current Officers, Directors and Consultants under the Company's 10% rolling stock option plan (the "Plan"). The options granted are for a five year period expiring September 28, 2020 at an exercise price of \$0.145 per share. This transaction is subject to TSX Venture Exchange approval.
