

Trigold Resources Inc. Changes Name to Crystal Exploration Inc.

14.10.2015 | [Marketwired](#)

VANCOUVER, Oct 14, 2015 - [Trigold Resources Inc.](#) (the "Company" and "Trigold") (TSX VENTURE:TGD) announces it has changed its name to Crystal Exploration Inc. ("Crystal"). Effective on October 15, 2015 the Common shares currently listed on the TSX Venture Exchange under the symbol "TGD" will commence trading under the new name "Crystal Exploration Inc." using the trading symbol "CEI".

Crystal is working towards finalizing the diamond properties acquisition announced on May 6, 2015.

The Property(s) specific to diamonds are within the highly prospective northern portion of the Slave Structural Province of the Canadian Shield. Historical work over the Prospecting Permits contain:

- (1) diamond bearing kimberlites and kimberlite dykes;
- (2) unexplained kimberlite indicator mineral ("KIM") trains identified in glacial till;
- (3) unsourced kimberlite float trains; and
- (4) unexplained geophysical targets in the vicinity of the heads of known KIM trains.

The Properties contain the Rush, James River and Muskox diamond bearing kimberlites. Most noteworthy within the Property is the Muskox Kimberlite which was previously discovered by and worked on by DeBeers Canada and Tahera Corp. The Muskox Kimberlite has two phases and is known to yield diamond grades in the magmatic phase of 0.53 carats per tonne and diamond grades in the pyroclastic phase of 0.35 carats per tonne from mini-bulk samples weighing 865 and 63 dry tonnes, respectively (2006). The largest three diamonds recovered from Muskox were a broken 2.73 carat white octahedron, a broken 2.67 carat brown octahedron and a 1.61 carat white octahedron.
