

Vancouver, BC / TheNewswire / November 9 2015 - [Cardiff Energy Corp.](#) (the "Company") (TSX-V: "CRS", Frankfurt: "C2Z.F", US Pinksheets: "CRRDF") is pleased to announce that they have negotiated a deal to purchase the 10% working Interest ("WI") from Martin Energies, the Operator of the Clayton #1H project. A new Operator will take over the Clayton #1H well and an operator agreement will be signed very shortly.

We strongly believe in our business plan in Runnels County, Texas and need to work with a team of experts who can deliver results within a set budget. With this in mind management spent the last week in Texas meeting with oil and gas experts in the fields of operating, drilling, land/ lease acquisitions and completing and have put a go forward team together for the Clayton #1H and for their planned follow up wells.

The Company was hoping to have consummated the Buyout Agreement with the Operator late last week so that flow tests could have been completed over the weekend; however, paper work before the lawyers took additional time to finalize and so the agreement is scheduled to be signed shortly. At this time all equipment needed to complete an initial flow test is on site and the Company should be in a position to commence the 2 day operation this week. Following the signing of the Buyout Agreement the Company will hold a 70% working Interest ("WI") in the Clayton #1H with their JV Partner Equitorial Exploration Corp. holding a 30% WI.

In addition, the Company is pleased to announce that the Bearcat #4 has commenced production and the Company will be reporting a production rate as it becomes available.

Jack Bal, President and CEO of Cardiff Energy Corp., states "We now have a team of professionals in place who we are going to be working with as we put the Clayton #1H into production. With the strong results from drilling and the analysis done by our geologist we believe the Clayton #1H will be a success. Furthermore, we are also very excited about the many follow up drilling opportunities we have planned for our leases in Runnels County, Texas and that the Bearcat #4 has finally commenced production."
