

Rum Jungle Resources Ltd. AGM 2015 Presentation

20.11.2015 | [ABN Newswire](#)

Perth, Australia (ABN Newswire) - [Rum Jungle Resources Ltd.](#) (ASX:RUM) is an Australian listed company with both phosphate and sulphate of potash (SOP) resources.

Highlights from the presentation include:

- These minerals are essential for efficient agriculture and are critical components of the global food supply value chain
- Progressing investigations into a promising silica project, which may open the door to the high purity quartz (HPQ) market which has applications in semiconductors, fibre optics and solar panels
- Over the last few years the company has compiled an attractive portfolio of projects that have moved beyond exploration:
 - Discovered and evaluated the world class Ammaroo Phosphate Project located in the Northern Territory. A preliminary feasibility study has been completed with compelling results
 - Portfolio of SOP projects based on geologically scarce potassium and sulphate brine resources. SOP is a premium potash fertiliser (current SOP prices ~US\$700/t (A\$980/t)) with limited supply available globally. The Karinga Lakes project is the most advanced SOP project with a JORC resource and a scoping study completed.
 - Proximity to gas infrastructure for energy and existing transport infrastructure providing access to markets in Australia, Asia and Africa
- Both key fertiliser ingredient projects have the potential to be 1st-2nd quartile of global cost curves
- Processing routes defined using existing and well established technology minimising risks
- Significant and long term institutional shareholder support
- On the radar of global and regional fertiliser producers and private equity
