## Profile of the Company

Since its listing on the TSX Venture Exchange in 2007, Adventure Gold focused on discovering and developing high-quality gold deposits in the Abitibi region located in eastern Canada - one of the richest gold mining areas in the world. Adventure Gold has become, in a few years, an important player in the mineral exploration industry with one of the best portfolios of exploration properties along the main gold-bearing structures of the Abitibi Greenstone Belt. The Company is exploring mainly close to gold mines where mining production infrastructure is already in place, which distinguishes it from several other exploration companies. Adventure Gold's exploration team consists of mining professionals having worked previously for well-established producing companies, who understand industry challenges. The Company owns 100% of the rights on its Val-d'Or East main project (90km<sup>2</sup>; 770,000 ounces of gold at 2.6 g/t Au in Inferred resources of which 332,000 ounces at 2.4 g/t Au in-pit resources - January 2013, 43-101 technical report) and Detour Quebec. With 79M shares issued, 35% owned by institutions, close to 9% owned by the management, no debt, core business mining titles in good standing and JV properties with gold producers in Timmins and in Val-d'Or, Adventure Gold is well-positioned to benefit its shareholders.
