

Vancouver, BC / TheNewswire / November 30 2015 - [Cardiff Energy Corp.](#) (the "Company") (TSX-V: "CRS", Frankfurt: "C2Z.F", US Pinksheets: "CRRDF") is pleased to provide a follow up to their November 23, 2015 news release where they reported that the new Operator of the Clayton #1H, Eastern Shelf Operating LLC is on site and is commencing work to prepare for the initial production test.

Senior management of the Company arrived in Runnels County, Texas on Tuesday November 24, 2015 and met with the Operator to go over the initial production test plan. A high powered water and chemical treatment was applied to the Clayton #1H to enlarge the pore spaces and passages through which the Gardiner Lime formation will flow. Following the treatment the crew began to swab the well in preparation for the flow test. The crew worked hard to be in a position to complete the flow test late last week, however, with a severe weather pattern in the forecast and American Thanksgiving the Company with input from the Operator decided to hold off on the test until this week.

At this time Eastern Shelf Operating LLC is back on site and has re-commenced procedure to allow for the initial production test. The results of the test are expected later this week and will be shared with the market as soon as they are available.
