

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Dec 2, 2015) - [Select Sands Corp.](#) (TSX VENTURE:SNS)(OTC PINK:CLICF) (the "Company") is pleased to announce that certain officers and directors have been issued an aggregate of 500,000 options with an exercise price of \$0.40 pursuant to the Company's option plan.

In connection with his recent appointment as a director of the Company, Mr. Kime was issued 100,000 options under the Company's option plan. Each option is exercisable into one common share at an exercise price of \$0.40 at any time on or before the fourth anniversary of its issuance. All such options vested on granting.

As per his employment agreement Rasool Mohammad, the Company's President and Chief Executive Officer was issued 400,000 options under the Company's option plan. Each option is exercisable into one common share at an exercise price of \$0.40 at any time on or before the fourth anniversary of its issuance. All such options vested on granting.

About Select Sands Corp.

Select Sands' Sandtown property, located in northeast Arkansas, USA, is underlain by the Ordovician St. Peter sandstone formation, which is a major source of 'Ottawa White' Tier-1 frac sand/industrial sand selling into major US oil and gas basins as well as industrial and speciality end markets. The Sandtown property is located 3.1 miles from Highway 167 near a natural gas pipeline. The property has an active power line on the property and is located approximately 14.7 miles from the nearest rail system (see December 4, 2014 News Release). Compared to competitive sand mines located in Wisconsin owned by the largest US frac sand producers, Sandtown has a competitive location advantage as it is approximately 650 rail miles closer to the Texas/Louisiana oil/gas plays as well as the Houston port and industrial hub.

As per a recently completed Preliminary Economic Assessment report by Tetra Tech of Golden, Colorado, USA and Vancouver, BC, Canada, the Sandtown property contains 22 million tons of Indicated resources of silica sand with a pre-tax NPV valued at US \$160 million. This mineral resource is contained within 40% of the total property area (See June 10, 2015 News Release). The Company would like to remind investors that mineral resources for the Sandtown Property are not mineral reserves and do not have demonstrated economic viability and there is no certainty that this preliminary economic assessment will be realized.

The Company also owns high-grade gold deposit in the La Ronge Gold Belt, northern Saskatchewan. The Preview SW Gold Project hosts indicated resources containing 158,300 ounces of gold (2.61 million tonnes grading 1.89 g/t Au) and inferred resources containing 270,800 ounces (5.70 million tonnes grading 1.48 g/t Au) based on a 0.50 g/t Au cut-off grade (See October 31, 2013 News Release).

Douglas Turnbull, P.Geo., a Qualified Person as defined by National Instrument 43-101, has reviewed the scientific and technical information disclosed in this News Release.
