

Vancouver, BC / TheNewswire / December 15, 2015 - Durango Resources Inc. (the "Company" or "Durango") announces that management has acquired additional applications on ground adjacent to Nemaska Lithium (TSX.V-NMX). Durango currently owns 100% of 23 claim cells covering over 1,240 hectares of ground adjacent to Nemaska Lithium's proposed Whabouchi mine as posted on the map on the Durango corporate website.

Further to the news releases of November 23rd and December 9th, 2015, Durango will not be proceeding with the lithium brine claims adjacent to Pure Energy in Nevada. After discussions with several possible joint venture partners, Durango was unable to negotiate favourable terms; therefore it will not proceed with the right of first refusal on the East Fault acquisition in Nevada.

The Company will continue to explore in Quebec on the Decouverte and NMX East property due to their close proximity to each other, easy winter road access and the availability of experienced exploration crews.

Durango has applied for ground a few kilometers southeast of [Canada Carbon Inc.](#)'s (TSX.V-CCB) Miller property in southern Quebec which has the following historical reference from GM report 01579 in 1951, "...Le gisement consiste en un affleurement plat de calcaire cristallin de 200 pieds de longueur et d'une centaine de pieds de largeur..." which translates "...the deposit consists of a flat outcrop of crystalline limestone 200 feet in length and a hundred feet wide".

Additionally, Durango looks to explore its northwestern BC LNG related limestone claims in the New Year and will release additional updates as they become available.

#### About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Mayner's Fortune and Smith Island limestone properties in northwest British Columbia, the Decouverte and Trove gold properties in the Abitibi Region of Quebec, and the NMX East lithium property near the Whabouchi mine in Quebec, as well as three sets of claims in the Labrador nickel corridor.

DURANGO APPLIQUE AU SOL supplementaire adjacent A NMX et ne passeront pas aux revendications PE

Vancouver, Colombie-Britannique / TheNewswire 15 / Decembre 2015 - Ressources Durango Inc. (la <<Societe>> ou <<Durango>>) annonce qu'elle a acquis la gestion des applications supplementaires sur un terrain adjacent a Nemaska Lithium (TSX.V-NMX). Durango possede actuellement 100% de 23 cellules d'une superficie de plus de 1240 hectares de terrain adjacent a la mine Whabouchi propose de Nemaska Lithium telle que publiee sur la carte sur le site Web d'entreprise de Durango.

Suite aux communiquees de presse du 23 Novembre et le 9 Decembre, 2015, Durango ne donnera pas suite aux revendications de lithium de la saumure adjacentes a Pure Energy dans le Nevada. Apres des discussions avec plusieurs partenaires possibles de la coentreprise, Durango a ete incapable de negocier des conditions favorables; par consequent, il ne poursuivra pas le droit de premier refus sur l'acquisition Fault-Orient, dans le Nevada.

La Societe continuera a explorer au Quebec sur la propriete Decouverte et NMX-Orient en raison de leur proximite les uns aux autres, l'acces routier facile en hiver et de la disponibilite des equipes d'exploration experimentee.

Durango a demande sol a quelques kilometres au sud-est de la propriete (TSX.V-CCB) Miller du Canada Carbon Inc. dans le sud du Quebec qui a la reference historique suivant de GM rapport 01579 en 1951, "... Le gisement Consiste en affleurement de l'ONU plat de calcaire cristallin de 200 pieds de longueur et d'Une Centaine de pieds de largeur ... "

En outre, Durango cherche a explorer ses nord-ouest BC LNG revendications calcaires liees a la nouvelle annee et publiera des mises a jour supplementaires qu'ils deviennent disponibles.

#### A propos de Durango
