

PRESS RELEASE

DAJIN RECEIVES FAVOURABLE RESULTS FROM UGAMP MEETING

January 12, 2016 - Vancouver, BC - [Dajin Resources Corp.](http://www.dajin.ca) ("Dajin") (TSX-V: DJI) (OTC: DJIFF) (Frankfurt: A1XF20) is pleased to report that it is advancing the development of the San Jose and Navidad concessions, located on the Salinas Grandes salar in Jujuy Province, Argentina.

On December 29th, the province of Jujuy convened a "La Unidad de Gestión Ambiental Minera Provincial" (UGAMP; a meeting on the environmental management of mineral exploration) to review and ratify the proposed exploration plans of Dajin. These plans formed part of the agreement with the Cooperativa de Boratos, formed by members of the Tres Morros aboriginal community which was signed in July 2015. In addition to the government representatives, a number of delegates from local communities (including Tres Morros) were present. During the meeting no objections were raised to the granting of the exploration permit by either the government or the communities. There is now a 30 day period for consultation during which time Dajin may be requested to provide further information of its planned work program.

While awaiting the Governments ratification of the work program, Dajin Director, Dr. Catherine Hickson is in Jujuy to work with John Kieley, formerly Vice President of Exploration with [Lithium Americas Corp.](http://www.lithiumamericas.com), a member of Dajin's technical panel and the person who will head up Dajin's exploration efforts at the Salinas Grandes salar. The two will be working to set up an exploration program planned to commence as soon as the permit from the Government is issued and weather conditions are conducive for exploration. They recently met with the newly appointed provincial Secretary of Mines, Dr. Miguel Solar. Dr. Solar is keenly interested in increasing mining investment in Jujuy Province and making changes within the ministry to facilitate this outcome while balancing the needs of the communities and the environment.

About Dajin: (www.dajin.ca)

Dajin is an early stage energy metals exploration company holding a 100% interest in 215 placer claims known to contain lithium and boron values in the Teels Marsh region of Mineral County, Nevada. These claims, which cover 4,574 acres (1,851 hectares), was the birth place of US Borax Corp's first borax mine. Dajin has entered into an option agreement with Southern Sun Minerals Inc. (TSX-V: SSI) to explore the 191 placer claims covering 3,851 acres (1,558 hectares) in the Alkali Lake region of Esmeralda County, Nevada, 12 kilometers (7 miles) northeast of Rockwood's Clayton Valley Lithium operations.

Dajin also holds a 100% interest in concessions or concession applications in Jujuy Province, Argentina that were acquired in regions known to contain brines with potassium, lithium and boron values. These concessions total approximately 100,000 hectares (247,000 acres) with 80,248 hectares (198,000 acres) located in the Salinas Grandes/Guayatayoc salt lakes basin adjacent to concessions held by [Orocobre Ltd.](http://www.orco.com) (TSX-T: ORL), who is partnered with Toyota Tsusho. Dajin completed an agreement with the Cooperativa de Boratos, formed by members of the Tres Morros aboriginal community, for exploration of the 4,400 hectare (10,873 acres) San Jose and Navidad concessions within the Salinas Grandes salar.
