

TORONTO, ONTARIO--(Marketwired - Jan. 26, 2016) - [Honey Badger Exploration Inc.](#) (TSX VENTURE:TUF) ("Honey Badger" or the "Company") has staked ten additional claims (2 blocks) in the LG Diamond Project in Northern Quebec and continues to work on prioritizing drill targets.

Geophysical modelling and compilation of historic work revealed additional promising magnetic anomalies interpreted as possible kimberlites. These have now been staked as part of the LG Diamond Project. In addition, the compilation of previous work in the area revealed multiple occurrences of indicator minerals and chemical anomalies in lake sediments that are indicative of kimberlites (Fig. 1: [http://media3.marketwire.com/docs/160126\\_TUF\\_Fig-1.pdf](http://media3.marketwire.com/docs/160126_TUF_Fig-1.pdf)). Many of the indicator mineral occurrences are located down-ice of the Company's magnetic anomalies.

Quentin Yarie, President and CEO, commented *"Our initial review of historical data revealed additional targets and kimberlite indicators in the area covered by the LG Diamond Project. These all occur in a geological environment favourable to kimberlites. The company is eager to pursue its search of additional promising targets and consolidate its position in this prospective area for diamond exploration."*

#### LG Diamond Project Highlights

- Located in the James Bay region of Québec, close to road and power lines
- Local geological environment is favourable for diamondiferous kimberlites
- Property package consists of 55 claims covering 2,765 hectares
- 9 claim blocks are centered on circular magnetic anomalies
- Each magnetic anomaly could be a potential kimberlite pipe
- Lake sediments near the magnetic anomalies contain kimberlite indicators
- Exploration agreements are in place with local First Nations

#### Qualified Person

Quentin Yarie, PGeo. is the qualified person responsible for preparing, supervising and approving the scientific and technical content of this news release and is responsible for overseeing all aspects of the company's exploration programs.

#### About Honey Badger Exploration Inc.

Honey Badger Exploration is a gold and base-metals exploration company headquartered in Toronto, Ontario, Canada with properties in Québec and British Columbia. The company's common shares trade on the TSX Venture Exchange under the symbol "TUF".
