

February 5, 2016 / [Cardiff Energy Corp.](#) / TheNewswire - (the "Company") (TSX-V: "CRS", Frankfurt: "C2Z.F", US Pinksheets: "CRRDF") is pleased to announce that they have secured a \$250,000 line of credit which will be used to fund the acid treatment on the Clayton #1H and to put the well into production. The acid treatment will use in excess of 20,000 gallons of 15% HCL acid and will selectively stimulate the areas of the well bore that had the most significant hydrocarbon shows during drilling. The treatment is scheduled to begin during the week of February 15th, 2016.

Jack Bal, President and CEO of Cardiff Energy Corp., states "With the loan secured, we have now engaged a completion team to oversee the acid treatment of the Clayton #1H. Our geologist and team have reviewed the proposal and are confident that the plan will be a great success. Cardiff is now selecting the location of the next 2 wells and believes with the knowledge gained by drilling the Clayton #1H the next wells will be drilled much cheaper and move faster to the production stage."

Additionally, the Company wishes to announce that it has agreed to issue up to 6,000,000 Units at \$0.05 per Unit, each Unit consisting of one common share and one transferable share purchase warrant. One warrant will be exercisable for one additional common share at \$0.075 per share during the next two years. The proceeds derived from the total 6,000,000 Unit private placement will be used for the Clayton #1H and for general working capital purposes. Insiders of the Company will subscribe for a minimum of 2,000,000 Units of the financing. This transaction is subject to TSX Venture Exchange approval.
