

Vancouver, BC / TheNewswire / March 3, 2016 - [Durango Resources Inc.](#) (the "Company" or "Durango") is pleased to announce that it has added more ground to its property adjacent to Metanor Resources Moroy discovery in Quebec via an online staking application through GESTIM.

President and Director of Durango, Marcy Kiesman, states, "Durango is aggressively positioning itself with ground adjacent to the World's next Lithium Mine and beside two recent significant gold discoveries that were made in Ontario and Quebec. The two gold discoveries were made in areas where most believed it was improbable, however with simple exploration new gold discovery zones were revealed. At Moroy, it occurred a kilometer away from the historic mining, and at the Whitney gold project the new shallow gold deposit was discovered between several historic vertical mining operations which produced over 18 million ounces of gold. The close proximity of Durango's projects coupled with the geology give an excellent opportunity for discovery with Durango. With the current state of mineral exploration, Durango will be negotiating with several drilling companies on drilling for discovery. If you wish for Durango to contact you in this regard, email your contact information to: canadasnextdiscovery@gmail.com."

About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Mayner's Fortune and Smith Island limestone properties in northwest British Columbia, the Decouverte and Trove gold properties in the Abitibi Region of Quebec, and the NMX East lithium property near the Whabouchi mine in Quebec, the Buckshot Property near the Miller Mine in Quebec, as well as three sets of claims in the Labrador nickel corridor.
