

TSX.V Symbol (DMI)

KELOWNA, BC, March 7, 2016 /CNW/ - [Diamcor Mining Inc.](#) (TSX-V.DMI / OTCQX-DMIFF), (the "Company") announces the results of rough diamond tenders and sales for the Company's fiscal quarter ending March 31, 2016 from its Krone-Endora at Venetia project in South Africa (the "Project").

In an initial tender and sale held in January, the Company sold 3,697.33 carats of rough diamonds, for gross proceeds of US \$542,540.43, resulting in an average price of US \$146.74 per carat. In the second and final tender of the current fiscal quarter completed on February 29th, the Company sold 3,199.17 carats of rough diamonds, for gross proceeds of US \$485,834.09, resulting in an average price of US \$151.86 per carat. This brings the combined rough diamonds tendered and sold during the fiscal quarter to 6,896.50 carats, generating gross proceeds of US \$1,028,374.34 for an average price of US \$149.12 per carat. The price per carat realized during the tenders were consistent with Company expectations. Rough diamonds tendered and sold in the second tender were the result of rough diamonds recovered and delivered for preparation prior to a February 3, 2016 cut-off date. Rough diamonds recovered after February 3 and until March 31, 2016 will be recorded as rough diamond inventory on-hand for the fiscal year ending March 31, 2016.

The fourth fiscal quarter rough diamond tender and sale results represent a ~49% increase when compared to 4,619.11 carats tendered and sold in the Company's Fourth fiscal quarter ending March 31, 2015, and a ~22% increase in gross revenues when compared to US \$842,420.21 gross revenues reported in that same prior period. Of particular note during the current fiscal quarter, a 12.78 carat special rough diamond and a 7.50 carat rough diamond were recovered utilizing the new Tomra XRT sorting unit recently deployed at the Company's Project. These rough diamonds sold for US \$4,747.47 per carat, and US \$4,152.00 per carat respectively.

Rough diamonds tendered were the result of the continued processing of material in the +1.0mm to -26mm size fractions, along with initial limited processing of material from various larger size fractions during the period. The combined efforts currently underway are designed to support the continued advancement of objectives consistent with the recommendations of the updated NI43-101 Technical Report ("Updated Technical Report") filed by the Company on April 28, 2015, and to aid the Company in arriving at initial production decisions for the Project. The recovery of all rough diamonds to date are incidental to the ongoing commissioning and testing exercises performed at the Project. The above-noted testing exercises and incidental recoveries do not form part of the Updated Technical Report and therefore no general grade, price, or quality determination is intended by the Company at this time due to the nature and purpose of the processing of this material.

About Diamcor Mining Inc.

[Diamcor Mining Inc.](#) is a fully reporting publically traded junior diamond mining company which is listed on the TSX Venture Exchange under the symbol V.DMI, and on the OTC QX International under the symbol DMIFF. The Company has a well-established operational and production history in South Africa and extensive prior experience supplying rough diamonds to the world market.

About the Tiffany & Co. Alliance

The Company has established a long-term strategic alliance and first right of refusal with Tiffany & Co. Canada, a subsidiary of world famous New York based Tiffany & Co., to purchase up to 100% of the future production of rough diamonds from the Krone-Endora at Venetia Project at then current prices to be determined by the parties on an ongoing basis. In conjunction with this first right of refusal, Tiffany & Co. Canada also provided the Company with financing to advance the Project. Tiffany & Co. is a publically traded company which is listed on the New York Stock Exchange under the symbol TIF. For additional information on Tiffany & Co., please visit their website at www.tiffany.com.

About Krone-Endora at Venetia

In February 2011, Diamcor acquired the Krone-Endora at Venetia Project from De Beers Consolidated Mines Limited, consisting of the prospecting rights over the farms Krone 104 and Endora 66, which represent a combined surface area of approximately 5,888 hectares directly adjacent to De Beers' flagship Venetia Diamond Mine in South Africa. On September 11, 2014, the Company announced that the South African Department of Mineral Resources had granted a Mining Right for the Krone-Endora at Venetia Project encompassing 657.71 hectares of the Project's total area of 5,888 hectares. The Company has also submitted an application for a mining right over the remaining areas of the Project. The deposits which occur on the properties of Krone and Endora have been identified as a higher-grade "Alluvial" basal deposit which is covered by a lower-grade upper "Eluvial" deposit. The deposits are proposed to be the result of the direct-shift (in respect to the "Eluvial" deposit) and erosion (in respect to the "Alluvial" deposit) of material from the higher grounds of the adjacent Venetia Kimberlite areas. The deposits on Krone-Endora occur in two layers with an average total depth of less than 15.0 metres from surface to bedrock, allowing for a very low-cost mining operation to be employed with the potential for near-term diamond production from a known high-quality source. Krone-Endora also benefits from the significant development of infrastructure and services already in place due to its location directly adjacent to the Venetia Mine.

Qualified Person Statement:

Mr. James P. Hawkins (B.Sc., P.Geo.), is Manager of Exploration & Special Projects for [Diamcor Mining Inc.](#), and the Qualified Person in accordance with National Instrument 43-101 responsible for overseeing the execution of Diamcor's exploration programmes and a Member of the Association of Professional Engineers and Geoscientists of Alberta ("APEGA"). Mr. Hawkins has reviewed this press release and approved of its contents.
