

Vancouver, BC / TheNewswire / April 14, 2016 - [Durango Resources Inc.](#) (TSX.V-DGO), (the "Company" or "Durango") announces that it is negotiating on two additional parcels of potential lithium ground located near the Whabouchi property in northern Quebec. The first package is adjacent to the northwest boundary of Nemaska [Lithium Corp.](#) (TSX.V-NMX) Whabouchi property, and the second is located to the southeast of Nemaska Lithium and south of Durango's existing NMX East ground.

Durango has also staked 320 hectares south of its original NMX East ground which previously belonged to Tucana [Lithium Corp.](#) The staked area encompasses a pegmatite intrusion measuring approximately 3 kilometres long at surface and trending to the northeast, according to Quebec regional geologic mapping (2).

President Marcy Kiesman stated, "We are pleased to cover as much of the historically mapped pegmatites as possible in the region as they provide Durango with excellent targets for the upcoming pegmatite sampling and VLF survey which will enable us to pinpoint the extent of the pegmatites and establish drilling targets."

The technical contents of this release were approved by Mr. Case Lewis, P.Geo., a Qualified Person as defined by National Instrument 43-101. The property has not yet been the subject of a National Instrument 43-101 report.
