- 1Q16 net domestic production of 13.5 MMBOE topped guidance mid-point by 0.5 MMBOE
- 1Q16 Anadarko Basin average net production topped 78,400 BOEPD
- Total oil production was up nearly 20% year-over-year; domestic oil production was up 8% year-over-year
- 1Q16 domestic lease operating expense per BOE was down nearly 40% year-over-year
- Adjusted 1Q16 diluted loss per share of \$0.09
- Continued successful drilling in northern STACK, two infill spacing pilots planned for 2H16

THE WOODLANDS, Texas, May 3, 2016 /PRNewswire/ -- <u>Newfield Exploration Company</u> (NYSE: NFX) today reported its first quarter 2016 unaudited financial and operating results. Additional operational details can be found in the Company's @NFX publication, located on its website.

Newfield plans to host a conference call at 10 a.m. CDT on May 4, 2016. To listen to the call, please visit Newfield's website at http://www.newfield.com. To participate in the call, dial 785-830-7977 and enter conference code 5140605 about 10 minutes prior to the scheduled start time.

"Newfield posted solid results for the first quarter and we are delivering on the objectives outlined in our near-term business plan," said Newfield Chairman Lee K. Boothby. "We have taken strategic steps to preserve liquidity and strengthen our balance sheet while reducing expenses across the organization. Despite today's backdrop of lower commodity prices, we are improving our margins and outlook on future returns – particularly in the Anadarko Basin where well costs and margins continue to move in the right direction. Today, we raised our outlook for 2016 production and reiterated our guidance around lower operating expenses."

First Quarter 2016 Financial and Production Summary

For the first quarter, the Company recorded a net loss of \$624 million, or \$3.52 per diluted share (all per share amounts are on a diluted basis). The loss was primarily related to a full-cost ceiling test impairment of \$506 million, or \$2.85 per share. After adjusting for the effect of impairments, credit facility amendment fees and unrealized derivative losses, the net loss for the first quarter would have been \$16 million, or \$0.09 per share.

Revenues for the first quarter were \$284 million. Net cash provided by operating activities was approximately \$72 million. Net cash provided by operating activities before changes in operating assets and liabilities was \$170 million.

Newfield's total net production in the first quarter of 2016 was 15.2 MMBOE, comprised of 46% oil, 16% natural gas liquids and 38% natural gas. Domestic production in the first quarter was 13.5 MMBOE.

2016 Production Guidance and Capital Investments

Newfield increased its 2016 domestic net production guidance to 50 – 52 MMBOE (previous forecast: 49 – 51.0 MMBOE). Total Company net production guidance was raised to 54.5 – 56.5 (previous forecast: 53.3 – 55.3 MMBOE). Newfield is planning to commence drilling later this year on two infill spacing pilots in STACK. The pilots will test well spacing and include multiple wells on single pad locations. Newfield estimates it will be able to conduct the pilots within its previously stated 2016 capital investment outlook of \$625 – \$675 million (excludes capitalized interest and direct internal costs).

Note 1: Represents volumes lifted and sold regardless of when produced. Includes natural gas produced and consumed in operations of 1.5 Bcf during the three months ended March 31, 2016.

Note 2: Average realized prices include the effects of derivative contracts. Excluding these effects, the average realized price for domestic and total natural gas would have been \$1.83 per Mcf and the average realized price for our domestic and total crude oil and condensate would have been \$25.72 per barrel and \$26.70 per barrel, respectively. We did not have any derivative contracts associated with our NGL or China production as of March 31, 2016.

Note 3: All per unit pricing and expenses exclude natural gas produced and consumed in operations.

Explanation and Reconciliation of Non-GAAP Financial Measures

Adjusted Net Income (Earnings Stated Without the Effect of Certain Items)

Earnings stated without the effect of certain items is a non-GAAP financial measure. Earnings without the effect of these items are presented because they affect the comparability of operating results from period to period. In addition, earnings without the effect of these items are more comparable to earnings estimates provided by securities analysts. This measure should not be considered an alternative to net income (loss) as defined by generally accepted accounting principles.

A reconciliation of earnings for the first quarter of 2016 stated without the effect of certain items to net income (loss) is shown below:

	1Q16 (in millions)
Net Income (loss)	\$ (624)
Ceiling test impairments	506
Unrealized (gain) loss on derivative contracts	99
Credit facility amendment fees	3
Income tax adjustment for above items ⁽¹⁾	—

Earnings stated without the effect of the above items \$ (16)

(1) Our effective tax rate is less than 1% due to valuation allowances on our deferred tax assets.

Net Cash Provided by Operating Activities Before Changes in Operating Assets and Liabilities

Net cash provided by operating activities before changes in operating assets and liabilities is presented because of its acceptance as an indicator of an oil and gas exploration and production company's ability to internally fund exploration and development activities and to service or incur additional debt. This measure should not be considered an alternative to net cash provided by operating activities as defined by generally accepted accounting principles.

A reconciliation of net cash provided by operating activities to net cash provided by operating activities before changes in operating assets and liabilities is shown below:

1Q16

(in millions)

Net cash provided by operating activities

\$ 72

Net changes in operating assets and liabilities
