

Exxon Mobil Corporation (NYSE:XOM) and FuelCell Energy, Inc. will hold a media call today to discuss an agreement to pursue novel technology in power plant carbon dioxide capture through a new application of carbonate fuel cells, which could substantially reduce costs and lead to a more economical pathway toward large-scale application globally.

On the call will be Vijay Swarup, vice president for research and development at ExxonMobil Research & Engineering Company, and Chip Bottone, president and chief executive officer of FuelCell Energy, Inc.

The call will begin at 10:30 a.m. CDT and may be accessed by dialing (877) 311-5896 (United States) or (281) 241-6149 (International). Please reference confirmation code 7316844 to join the call.
