

May 10, 2016 / TheNewswire / Vancouver, British Columbia- [Nevada Energy Metals Inc.](#) "the Company" TSX-V: BFF (OTC: SSMLF) (Frankfurt: A2AFBV) is pleased to announce that an initial near surface auger sampling program on our 100% owned Teels Marsh West claims which covers approximately 810 hectares (2000 acres) in Mineral County, Nevada has recently been completed. Samples have been sent to ALS Labs, Reno, Nevada, one of the world's largest and most diversified testing services providers.

This orientation phase of the lithium detection sampling consisted of 27 shallow auger holes (up to 1.5 meters). The program was designed to collect playa sediment samples near to a thermal anomaly located on and adjacent to a range front fault system along the west side of Teels Marsh. This thermal anomaly was discovered during research into the relationship between geothermal systems and Quaternary borate deposits previously mined at Teels Marsh (Coolbaugh et al. 2006). Close proximity to a geothermal heat source is believed to be one of the principal requirements for concentrating lithium in the brines at Clayton Valley, home to the first commercial lithium brine operation in North America.

About Nevada Energy Metals: <http://nevadaenergymetals.com/>

[Nevada Energy Metals Inc.](#) is a well funded Canadian based exploration company who's primary listing is on the TSX Venture Exchange. The Company's main exploration focus is directed at lithium brine targets located in the mining friendly state of Nevada. The Company has 100% ownership in 87 claims in Clayton Valley, only 250m from Rockwood Lithium, the only brine based lithium producer in North America. Nevada Energy Metals has also acquired, 100 claims (Teels Marsh West) covering 2000 acres (809 hectares) at Teels Marsh, Mineral County, Nevada, a highly prospective lithium exploration project, 100% owned without any royalties, located on the western part of a large evaporation lake where a phase one, 27 hole shallow auger exploration program is in progress. Recently the Company announced the addition of the San Emidio Desert lithium project, consisting of 155 claims (approximately 3,100 acres/1255 hectares) in Washoe County, Nevada. The Company's first lithium project, Alkali Lake, in Esmeralda county, is a 60% earn in option agreement from Dajin Resources Corp, where near surface lithium has been confirmed.

On Behalf of the Board of Directors
