

May 26, 2016 / TheNewswire / Vancouver, British Columbia- [Nevada Energy Metals Inc.](#) "the Company" (TSX-V: BFF; OTCQB: SSMLF) (Frankfurt: A2AFBV) is pleased to announce that it has completed an orientation survey at Teels Marsh, Esmeralda County Nevada. Nevada Energy Metals collected twenty-seven shallow auger sediment samples from the Teels Marsh West Project area April 18 - 20, 2016. The sampling program was primarily a test of the sampling method to see if it could be used to collect samples beneath low sand dunes and alluvial gravel. This goal was met in most locations.

Samples were collected using a powered auger to reach a maximum depth of 2.9 meters (9.5 ft.) below the surface. The holes were initially drilled with an electric auger and bottom hole samples were collected with a hand tulip style sampler. Sampling was conducted by Pediment Gold LLC of Sparks, Nevada. Samples were collected on site and transported to the ALS Global preparation facility in Elko, Nevada by the Nevada Energy Metals project geologist. Samples were analyzed by ALS using their MEMS41 multi-element package. QA/QC standards and blanks were inserted into the sample stream to assure accuracy.

Lithium values ranged from 8.9 to 104.5 ppm. The two best results (93.2 and 104.5) were obtained downstream of thermal springs on the western part of the property. A general increase in values was noted at the playa margin with lower values in the alluvial fan on the southwestern part of the property. Many of the sites on the alluvial fan did not penetrate to the maximum depth due to boulders. Sampling was supervised by Alan J. Morris CPG who serves as the project geologist and Qualified Person on the Teels Marsh West Project.

About Nevada Energy Metals: <http://nevadaenergymetals.com/>

[Nevada Energy Metals Inc.](#) is a well funded Canadian based exploration company who's primary listing is on the TSX Venture Exchange. The Company's main exploration focus is directed at lithium brine targets located in the mining friendly state of Nevada. The Company has recently completed (1) a 70/30 farm-out option JV on 77 claims in Clayton Valley, approximately 250m from the Rockwood Lithium mine, the only brine based lithium producer in North America; (2) acquisition of 100% of the Teels Marsh West project (100 claims covering 2000 acres/809 hectares) in Mineral County, Nevada; (3) acquisition of 100% ownership of the Black Rock property (128 claims covering 2,560 acres/1,036 hectares) located in southwest Black Rock Desert, Washoe County, Nevada; (4) acquisition of 100% ownership in the San Emidio Project (155 claims, 3,100 acres/1,255 hectares) near Empire, Washoe County, Nevada; (5) the acquisition of the Alkali lake Project, 60% Option from [Dajin Resources Corp.](#) (191 claims covering 3,820 acres/1,558 hectares) in the Esmeralda County, Nevada.

On Behalf of the Board of Directors
