## *About Focus*

Focus is developing the Bayovar 12 phosphate deposit located 40 km from the coast in the Sechura District of northern Peru. Bayovar 12 hosts a large resource of highly-reactive sedimentary phosphate rock - a key raw material input for fertilizers and vital to world food production. Reactive phosphate rock from Sechura is a natural, slow-release source of phosphorus that can be applied directly to crops. Focus aims to supply direct application phosphate rock to the nearby agricultural regions of South and Central America, the fastest growing fertilizer market in the world.
