

Clean Commodities Corp. Expands Labrador Trough Project

05.07.2016 | [FSCwire](#)

Vancouver - [Clean Commodities Corp.](#) (TSX-V: CLE) ("Clean Commodities" or the "Corporation") is pleased to report that it has expanded its mineral tenure position in the Labrador Trough.

"Clean Commodities is pleased to have moved to expand our mineral tenure position in the Labrador Trough. We were not surprised when our neighbour Northern Shield Resources recently staked additional ground on the borders of our original Sun Valley and Liberty project boundaries, something we believe speaks to the broadening exploration potential of this area," stated Ryan Kalt, Chief Executive Officer of Clean Commodities.

Moving forward, the Corporation will refer to its Sun Valley and Liberty PGE projects which are now contiguous and connected by claim cells, as the Labrador Trough PGE Project. In aggregate, the Corporation's Labrador Trough PGE Project is expected to cover approximately 28,495 ha which represents the largest mineral tenure holding in the immediate area.

Updated maps of the Labrador Trough PGE Project are now available on our website, www.cleancommodities.com.

Further information on the Corporation's projects in the area can be found in our news releases dated June 1, 2016 and May 25, 2016.

Additional Tenure for the Labrador Trough PGE Project

As part of its Labrador Trough PGE Project and as shown on the maps now available through our website, the Corporation has acquired a further 117 full and partial claim cells constituting approximately 5,654 ha. This additional ground was acquired through map designation and is currently within the pending phase of acquisition. All required fees have been paid and tenure ownership is expected to be confirmed shortly. This new ground was acquired by the Company through an arm's length exploration services company at a cost equating claim fees plus a 2% royalty.
