Skyharbour will have 22,260,890 shares issued and outstanding post consolidation and the Company's new CUSIP Number is 830816 60 9.

About Skyharbour Resources Ltd.:

Skyharbour holds an extensive portfolio of uranium and thorium exploration projects in Canada's Athabasca Basin and is well positioned to benefit from improving uranium market fundamentals with five drill-ready projects. In addition to the Moore Lake Uranium Project Option, the Company owns a 100% interest in the Falcon Point (formerly Way Lake) Uranium Project on the eastern perimeter of the Basin which hosts an NI 43-101 inferred resource totaling 7.0 million pounds of U₃O₈ at 0.03% and 5.3 million pounds of ThO₂ at 0.023%. The project also hosts a high grade surface showing with up to 68% U₃O₈ in grab samples from a massive pitchblende vein, the source of which has yet to be discovered. Skyharbour has a 50% interest in the large, geologically prospective Preston Uranium Project proximal to Fission Uranium's Triple R deposit as well as NexGen Energy's Arrow deposit. The Company's 100% owned Mann Lake Uranium project on the east side of the Basin is strategically located adjacent to the Mann Lake Joint Venture operated by Cameco with partners Denison Mines and AREVA, where high-grade uranium mineralization was recently discovered. Skyharbour's goal is to maximize shareholder value through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in geopolitically favourable jurisdictions.
