

Vancouver, BC / TheNewswire / August 3, 2016 - [Durango Resources Inc.](#) (TSX.V-DGO), (the "Company" or "Durango") announces that further to the news release of July 29, 2016, Durango's exploration team and Marcy Kiesman are on site in Nemaska, Quebec.

As previously announced on June 23, 2016, Mr. Donald Theberge, P.Eng., M.B.A is leading the exploration program which will include detailed mapping and sampling of the newly identified pegmatite outcrops and outcropping ridges on Durango's Nemaska Whabouchi area properties. Mr. Theberge's compilation report on Durango's ground adjacent to and near the proposed Whabouchi Lithium deposit in Quebec, confirmed newly identified outcrops and outcropping ridges. It was also confirmed that these outcrops were not previously evaluated by Tucana or any other company, and as such, these outcrops will be the focus of the current program and are of significant interest.

The current program of Durango follows the recommendation made by Mr. Theberge to immediately initiate a sampling and mapping program.

Marcy Kiesman, CEO of Durango, comments, "We are very fortunate to have Donald Theberge direct and organize the work program. I am excited to meet and work with the Cree First Nation of Nemaska and land users to provide partnership opportunities and synergies wherever possible."

The technical contents of this release were approved by Mr. Donald Theberge P.Eng., M.B.A., a Qualified Person as defined by National Instrument 43-101. The property has not been the subject of a National Instrument 43-101 report.
