About CGM Resources Ltd:

CGM Resources Limited is acquiring and exploring mineral properties with development potential in Colombia. Colombia is recognized as one of the most under-explored countries in the world, yet it is rich with deposits of gold, copper and silver. There is a high discovery potential within a pro-mining business atmosphere.

The Company has a pipeline of quality projects and a management team with in-country expertise. CGM's core purpose is to be a world leader in generating value through responsible mining. With experienced management and a sustainable growth profile.

Internationally, Colombia continues to gain favor among entrepreneurs as "the place to do business" as we move into the next decade. Due to recent history, there has long been a "Colombia discount" applied to the stocks of companies doing business there; however because of vastly improved and stabilized political and business environment this discount is rapidly becoming a premium.

The company feels that unlike other "flavor-of-the-day" plays, there is good reason to expect the Colombia Gold Rush to last-- the country is very rich in natural resources. Due to the stigma caused by the previous period of civil unrest in the Colombian countryside, Colombia has lacked exploration for decades, but now provides a contrarian entry for strong modern exploration companies.
