About Mineral Mountain

[Mineral Mountain Resources Ltd.](#), through its wholly owned subsidiary Mineral Mountain Resources (SD) Inc., is focused on the systematic exploration using modern methods and, if warranted, the development of its 100%-owned Rochford Gold Project situated a short distance from the highly prospective Homestake Mine within the same Belt located in the Black Hills of South Dakota, U.S.A. The Rochford Project, which is continuously expanding, covers approximately 5,500 acres and straddles several bands of auriferous iron formation over a 9 km strike length and across a 4 km stratigraphic width. The Rochford Gold District geologically is remarkably similar to the Homestake Mine and largely under-explored.

The Rochford Project is located near Rapid City where it is easily accessed by a network of roads and has hydro-electricity and modern internet services to the drill sites. As well, the area offers a skilled labor force and is one of the lowest cost exploration areas in the United States. South Dakota has a low political risk and embraces responsible mineral development.

On Behalf of the Board of Directors, MINERAL MOUNTAIN RESOURCES LTD.
