

Sienna Resources Inc. Now Fully Quoted on the USA Market Under SNNAF

15.09.2016 | [Newsfile](#)

Vancouver, September 15, 2016 - [Sienna Resources Inc.](#) (TSXV: SIE) (FSE: A1XCQ0) (OTC Pink: SNNAF) wishes to announce that Sienna Resources has now been cleared by FINRA and now fully quoted on the OTC Markets under the new symbol SNNAF.

Jason Gigliotti, President of [Sienna Resources Inc.](#) stated, "We are now fully quoted on the OTC Markets. This will enable our USA shareholders to be able to see a live quote which will create far greater transparency on the trading. We have had a large amount of interest from individuals located in the USA since announcing our Clayton Valley Deep Basin Lithium Brine Project and we felt it was prudent to have a full quote for those shareholders. We are also very pleased to hear that our neighbour, Pure Energy has had more success drilling on their recent deep drill program. It was the deepest drilling to date and ended in brine at depth. Considering Sienna's property is located in the deepest sections of this basin, we are very optimistic about our planned future work program."

We are also very fortunate to be able to engage GeoXplor who have the most intimate knowledge of Clayton Valley. The GeoXplor team have been instrumental with the development and discovery regarding the lithium brine deposit that [Pure Energy Minerals Ltd.](#) has, and we look forward to utilizing their experience and expertise to develop our "Clayton Valley Deep Basin Lithium Brine Project." GeoXplor has proven to be the preeminent Clayton Valley lithium brine discovery team. We are very excited to start up our program as Sienna is located in the deepest sections of the basin that holds the only lithium development in Nevada"

Sienna's "Clayton Valley Deep Basin Lithium Brine Project" is located directly between and bordering [Pure Energy Minerals Ltd.](#) and [Lithium X Energy Corp.](#) The "Clayton Valley Deep Basin Lithium Brine Project" is located in parts of the deepest sections (refer to the map) of the only lithium brine basin with a producing operation in North America (Albemarle's Silver Peak Mine).

John Rud M.Sc. Geologist and a Principal of GeoXplor Corp states that "We look forward to working with the Sienna team as their project is located in the deepest sections of the Clayton Valley Basin, the only producing lithium brine basin in North America, with no company to date, testing these deeper sections. Their (Sienna's) efforts in this regard is something we are very excited about".

President Jason Gigliotti will also be presenting at the MoneyShow in Toronto on September 16 and 17 at the Metro Toronto Convention Centre. This show is a well-attended show that features many fund managers and individual high net worth investors. Please feel free to come ask questions in person.

If you would like to be added to Sienna's email list please send an email to info@siennaresources.com or our twitter account at [@SiennaResources](#)
