

Everton Resources Inc. Announces Hecla Will Perform a \$925,000 Exploration Program

23.01.2017 | [Marketwired](#)

Including 2,500 Metres of Drilling, on the Opinaca B Property in the Eleonore Mining Camp in James Bay, Quebec

OTTAWA, Jan. 23, 2017 - [Everton Resources Inc.](#) ("Everton" or the "Company") (TSX VENTURE:EVR) (FRANKFURT:EVR) (OTCQX:EVRRF) is pleased to announce that [Hecla Mining Company](#) ("Hecla") (NYSE:HL) will invest \$925,000 in an exploration program on the Opinaca B gold property, held by Everton and its partner [Azimut Exploration Inc.](#) (TSX VENTURE:AZM).

The 2017 program will consist of a ground magnetic and electro-magnetic survey, followed by 2,500 metres of diamond drilling that will focus on two targets with strong potential for gold discoveries: the Dominic area and the Fishhook structure (see appended figures). Hecla greatly improved the definition of these targets during the 2016 program, which included a detailed interpretation of previous magnetic data and comprehensive field work. The Opinaca B property, comprising 248 claims covering 129.7 km², is located in a highly prospective part of the Eleonore mining camp.

Field work conducted in 2016 consisted of the following: prospecting and the collection of 548 rock grab samples; mechanized stripping in 6 different areas; and channel sampling along 10 distinct channels for a total length of 202.2 metres.

A total of 12 grab samples returned values higher than 0.1 g/t Au, including 1.4 g/t Au and 1.1 g/t Au from outcrops (Dominic Prospect), and 1.4 g/t from a block (Fishhook Prospect). These anomalous values are generally associated with metasediments and paragneisses carrying sulphides and/or magnetite.

A total of 9 channel samples returned values higher than 0.1 g/t Au in metasediments, including 1.8 g/t Au over 0.75 m and 1.2 g/t Au over 1.0 m from the Dominic Prospect.

Hecla has the option to acquire a 50% interest in the Opinaca B property by incurring \$6 million in exploration work. The Company anticipates this expenditure should be completed by November 2017. Following this first option, Hecla has been granted a second option which terms have been described in Everton's press releases dated September 16, 2010 and April 21, 2016.

This press release was prepared by geologist Jean-Marc Lulin, acting as Azimut's Qualified Person under NI 43-101.

About Everton Resources Inc

Everton is an exploration company with concessions in the Dominican Republic adjacent to the Pueblo Viejo Mine, owned by the world's two largest gold mining companies, [Barrick Gold Corp.](#) (60%) in partnership with [Goldcorp Inc.](#) (40%) ("Goldcorp"). Everton also holds an interest in the Opinaca region of James Bay, Quebec where the Company has partnered with [Hecla Mining Company](#) which is advancing Everton's interest in the Opinaca B project by funding 100% of all exploration work on one of the largest land packages adjacent to Goldcorp's Eleonore gold deposit. Everton recently announced the acquisition of two properties: the Blue Sky Jackpot lithium property in Ontario and the Detour Lake gold property in Quebec.
