Threefold Strategy

- Application of new technology/ideas to make new discoveries in Tennant Creek (Goanna copper, Mauretania gold, Edna Beryl gold)
- Small Mines - monetise existing resources and provide opportunities for "near mine" discoveries (Edna Beryl under development and will be one of Australia's highest grade gold mines plus pipeline of others)
- Leverage new technology/ideas outside of the Tennant Creek Project New gold-copper projects in New South Wales and the NT

Summary and Conclusions

Tennant Creek Exploration fully funded by Evolution Mining - have spent ~\$11.7m of the \$15m to earn 65% of the Tennant Project

- 2017 Exploration Program yet to be finalised but will include a detailed ground gravity survey at Edna Beryl and Deep Penetrating IP at Rover - ahead of drilling (strategy 1)
- Small Mines to monetise existing high grade resources and expand near mine exploration (strategy 2)
- New technology and ideas continue to drive exploration.....both in Tennant Creek (strategy 1) and identifying new gold-copper opportunities (strategy 3)
- ERM remains well funded ~\$4.7m in cash plus potential for risk free cash from small mines
- Highly leveraged to success across all strategic horizons
