

MacDonald Mines Provides Update on Exploration Programs of Both Holdsworth and Charlevoix

23.02.2017 | [Marketwired](#)

Composite Samples Up to 99.39% High Purity Silica From Charlevoix

TORONTO, Feb. 23, 2017 - [MacDonald Mines Exploration Ltd.](#) (TSX VENTURE:BMK) ("MacDonald Mines", or the "Company") has begun exploration programs at both its Wawa-Holdsworth Gold Project near Wawa, Ontario, and its Charlevoix Silica Property located approximately 42 kilometres north of Baie-Saint-Paul, Quebec. The sampling program conducted at Charlevoix suggest that the high purity quartzite unit mined at the Sitec Silica Mine extends on the property.

Wawa-Holdsworth Project

Havenan Brothers completed 62 kilometres of line cutting at the Wawa-Holdsworth Project in order to conduct magnetic and electromagnetic surveys on the property. The Company intends to utilize this data to map, model and highlight prospective drill targets.

The Wawa-Holdsworth Project is comprised of 18 contiguous patented mining claims covering approximately 285 hectares, located 20 kilometres northeast of Wawa, Ontario.

Three gold targets have been identified on the property:

- Lode Gold in traditional quartz veins, known as the "The Soocana Vein",
- an oxidized cap at surface developed over a massive pyrite zone (Algoma Iron Formation) known as the "The Oxide Sands", and
- the precursor to the Oxide Sands - a massive pyrite zone (Algoma Iron Formation) at depths, known as "The Massive Sulphide".

The Company believes that there is potential to find additional high-grade gold mineralization at the Wawa-Holdsworth Project.

Charlevoix Silica Property

MacDonald Mines carried out a reconnaissance and prospecting program in January 2017 at the Company's Charlevoix Silica Property. The objective of the program was to assess access to the property and collect outcrop samples.

Results of the quartzite composite samples are as follows:

Sample_ID	SiO2_%
17205	98.43
17206	98.67
17207	99.39
17208	98.96
17209	98.97
17210	99.11

A total of 12 composite samples were collected, 6 of which were of the quartzite unit being targeted by the program, and several structural measurements and bedrock locations were recorded. The presence of the quartzite unit and its projected location on the claims was confirmed, and it was traced for approximately 500 meters in length (see Figure 1).

Quentin Yarie, MacDonald's President and CEO commented, "The assay results support Charlevoix's high

purity silica potential. Despite the snow cover, it is apparent that the presence of the quartzite unit as mapped by the government exists. We have every reason to believe that our property, located only 15 km from the Sitec Silica Mine, hosts high purity silica. The fact that the Charlevoix quartzite unit consists of a fold should provide a much thicker quartzite unit on our property."

The Sitec Silica Mine has been in production for more than 50 years. It produces approximately 250,000 tonnes of silica a year and has an estimated future mine life of over 20 years. Silica from the Sitec Mine is shipped to plants in Bécancour, Chicoutimi and the United States. Silica produced at Sitec is used at foundries and glass factories as well as in the production of solar panels and high-tech components.

Prospectors and Developers Association of Canada ("PDAC") Convention

Investors are invited to visit booth #2512 on March 5-8, 2017, to meet with MacDonald's management and staff to discuss the Company's recent activities and projects.

About MacDonald Mines Exploration Ltd.

[MacDonald Mines Exploration Ltd.](#) is a mineral exploration company headquartered in Toronto, Ontario, Canada. Previously focused on Copper and Zinc (VMS), and Nickel exploration in the Ring of Fire area of the James Bay Lowlands of Northern Ontario, the company recently acquired the Charlevoix Silica Property in Quebec and entered into an option and joint venture agreement with Noble Mineral Exploration Inc. to advance exploration on Noble's Wawa-Holdsworth Gold and Silver Project in Ontario.

The Company's common shares trade on the TSX Venture Exchange under the symbol "BMK".
