About Wallbridge Mining

Wallbridge is establishing a pipeline of projects that will support sustainable production and revenue as well as organic growth through exploration and scalability.

Wallbridge is currently preparing to develop its 100%-owned high-grade gold Fenelon Mine project in Quebec with a production decision targeted for Q2 2017. Wallbridge is also in discussions regarding several other advanced stage projects which could become the Company's next mines. These discussions benefit from the operating capabilities Wallbridge demonstrated by safely and efficiently mining the Broken Hammer deposit in Sudbury, which was completed in October 2015.

Wallbridge is also continuing active partner-funded exploration on its large portfolio of nickel, copper, and PGM projects in Sudbury, Ontario. Currently, Wallbridge is completing a 20,000 metre fully partner-funded drilling program on its high-grade Parkin nickel-copper-PGM project.

Wallbridge also has exposure to active exploration for copper and gold in Jamaica and British Columbia through its 13% ownership of [Carube Copper Corp.](#) ("Carube Copper") (CUC:TSX-V, formerly Miocene Resources Limited).
